

Harald Stolberg Radiology Excellence Fund Application

Each applicant must provide a written reply to each of the following questions in an electronic format and emailed to the OAR office. mail@oarinfo.ca

The application should contain the following pieces of information:

Proposed International Course Information

1. A description of the proposed fellowship and a description how these skills could be implemented in to an Ontario radiology setting. Is this an area where you plan to sub-specialize? What will you do with this skill when you return to Ontario? Please limit to 2 pages.
2. Provide information and a description of the fellowship program.
3. Will there be any language requirements other than English or French? If yes, do you meet the program requirements?

General Information Requirements

1. Provide a copy of your curriculum vitae with full contact information.
2. Provide a letter of reference and recommendation from the Chair of your Ontario radiology teaching program.
3. Provide a letter of acceptance from the international host site from the proposed site's imaging Program Teaching Head or equivalent.
4. Sign a letter of agreement that the applicant will ensure upon completion of the fellowship that he/she will complete a report to the OAR on behalf of the Adjudicating Committee following the completion of the educational program. This report will be in conformance with the following section (Post-Study Report Requirements).
5. Provide a confirmatory statement that it is the applicant's intention to practise in Ontario.
6. Agreement to provide receipts as required.

Post-Study Report Requirements

The report should include the following as a minimum:

1. Confirmation of the time and location spent on the scholarship fund with dates.
2. A statement from the head of the department or section with whom the applicant worked.
3. Description of the learning experience in terms of what benefits the applicant gained in terms of technique and/or clinical applications, and/or scientific or research methodology. In the clinical context this statement should include a number of cases that the fellow was involved in.
4. A statement including the number of teaching sessions or conferences in which the applicant was involved.
5. Applicant should describe the Canadian context in which the learning could be applied.
6. Indicate if any scientific journal or meeting has/or will be created or organized arising from this experience.
7. All other information that the application feels adds to his/her application.
8. Any special considerations that should be taken into account.
